

As a subscriber to XM Satellite Radio, I strongly and respectfully urge the FCC to reject NAB's petition 04-160. We finally have a product that does not rely on advertiser's dollars. We get a chance to listen to what we want, when we want without interruption's from advertisements we don't really want to hear. I gladly pay for this right through a subscription fee and it would not be right for this to be limited in any way shape or form.
